Abstract :

DE19631421 A

The wound dressing comprises a hydrophobic bacteria-adsorbent material containing an antimicrobial active substance which does not enter the wound.

ADVANTAGE: The dressing acts as a barrier to microorganisms and also

adsorbs bacteria from the wound. Taking away the dressing removes dead bacteria and unused antimicrobial agent from the wound.

Manual Codes :

CPI: D09-A01C D09-C04B D09-C04D F04-E04
